E2U Universal Industrial Cable Gland

CMP E2U type brass indoor and outdoor cable gland for use with all types of Lead Sheathed and Armoured cables providing an environmental seal on inner lead sheath and the cable outer sheath.

All CMP Cable Glands are EMC Tested.

The cable gland provides mechanical cable retention and electrical continuity via the armour termination and also earth bonding of the inner lead covering or lead sheath. A reversible armour cone and AnyWay universal clamping ring arrangement allows the cable to be easily disconnected from the equipment, for maintenance and change out etc. This feature also facilitates remote make off procedures when the termination is to be conducted in confined spaces or in areas of restricted access. Separate tightening actions for the inner displacement seal and the armour termination affords maximum control over the pressure applied to the cable inner lead covering.

The CMP E2U range of industrial cable glands is designed and tested to [BS 6121:Part 1:1989](#), meets or surpasses the requirements of [EN 50262:1999](#), and is produced from Brass grade CuZn39Pb3 (CW614N) to EN12168.

Note: Stepped Cone is suitable for SWA cables, Grooved Cone is suitable for all other approved armoured cables

Note: Deluge proof version available
